

code	Product	Definition	Synonyms	Risk assessments
4.044	Chicory pulp, dried	Dried by-product which is released during the extraction of inulin after the reduction or grinding of cleaned roots of the chicory plant, <i>Cichorium intybus</i> L. to which beet molasses may or may not have been added.		Chicory processing industry (4, 032, 06-12-17)
4.043	Chicory pulp, pressed	Wet by-product which is released during the extraction of inulin and/or oligofructose after the reduction or grinding of cleaned roots of the chicory plant, <i>Cichorium intybus</i> L.	Cat. 68/2013: 4.4.4	Chicory processing industry (4, 032, 06-12-17)
4.040	Chicory roots	Roots of the chicory plant, <i>Cichorium intybus</i> L. var. <i>sativum</i> DC.		Chicory processing industry (4, 032, 06-12-17)
4.038	Chicory roots flakes, dried	Product obtained by chopping and drying of chicory roots.		Chicory processing industry (4, 032, 06-12-17)
4.046	Chicory roots, not pulled	Roots of the chicory plant, <i>Cichorium intybus</i> L.		Chicory roots, pulled (1, 243, 14-09-10)
4.045	Chicory roots, pulled	Roots of the chicory plant, <i>Cichorium intybus</i> L. from which the chicory is removed.		Chicory roots, pulled (1, 243, 14-09-10)
4.049	Chicory vinasses	Product of chicory processing, obtained during the refining of inulin and oligofructose.		Chicory processing industry (4, 032, 06-12-17)
13.020	Chocolate	Products usually with sugar and cocoa mass/butter as main components that are destined for human consumption. Excluded are products which have arisen in food safety incidents.		Confectionery industry (2, 256, 06-05-14)
9.006	Cholesterol	Animal feed material obtained from woolgrease by saponification, separations and crystallization	FMR no. 01043-EN	Cholesterol (1, 400, 05-04-18)
9.024	Chondroitin sulphate (from marine origin)	Product obtained by extraction from tendons, bones and other marine animal tissues containing cartilage and soft connective tissues.	Cat.68/2013: 9.17.1	Chondroitin sulphate (from marine origin) (1, 333, 23-11-15)
12.004	Cider yeast	By-product obtained during the production of fruit wine. The product consists of the yeast which is filtered off after the fermentation.		Fruit juice processing (1, 233, 14-09-10)
5.012	Citrus extract ✓	Vegetal feed material obtained from Citrus fruit (Grapefruit ( <i>Citrus paradise</i> ), Mandarin orange ( <i>Citrus reticulata</i> ), Bergamot ( <i>Citrus aurantium</i> L., bergamia), Sweet orange ( <i>Citrus sinensis</i> )), fermented naturally, and on inert carrier. Liquid form may contain up to 50% of glycerine as carrier. Powder form may contain up to 19% of glycerine and 32% of silicium dioxide as carriers).	FMR no. 02397-EN ✓	Citrus extract (1, 401, 13-04-18)
5.011	Citrus peelings, moisture rich	By-product consisting of the peelings of citrus fruit <i>Citrus</i> ssp. and fruit not meeting the food quality requirements which remains after the pressing of citrus fruit <i>Citrus</i> ssp. during the preparation of citrus juice.		Citrus peelings and citrus pulp (1, 035, 15-01-13)
5.010	Citrus pulp	By-product that exists from the pressing of citrus fruit <i>Citrus</i> ssp. or during the preparation of citrus juice. During drying chalk is often added.		Citrus peelings and citrus pulp (1, 035, 15-01-13)
13.068	Coating products from the confectionary industry	Products mainly based on cereals/sugar coated with chocolate or fat/powder (mainly sugar) that are destined for human consumption.		Confectionery industry (2, 256, 06-05-14)
2.012	Cocoa bean expeller	By-product of the recovery of oil / butter through pressing out of cocoa beans, <i>Theobroma cacao</i> L.	Cocoa expeller cake	Cocoa industry (3, 030, 16-07-13)
2.013	Cocoa bean meal	By-product of the recovery of cocoa butter through extraction from cocoa bean expeller.	Cocoa bean extracted, Cocoa solids, defatted	Cocoa industry (3, 030, 16-07-13)
